

Wood Filler

NEW better bucket - same high quality!

Wood Filler is a fine-grained water-based, ready-to-use paste filler for wood. Its fine-grained consistency makes it easy to handle and apply to knots, cracks and other damages in wood.

Wood Filler can be used for various types of wood repairs. It is a popular filler for repairs in wood productions due to its fine consistency. Wood Filler is also highly suitable for intermediate sandings.

Wood Filler does not contain any dangerous particles for the user.

400g e
bucket
